How to get the first DFILE token to start farming?

Way 1

First supply of tokens for miners from DNET tokens 1 : 1 with 1 year vesting (Currently the supply is 18M DNET).

How to get a DFILE token if you have a DNET token? It will happen automatically, but you can change your ethereum address to get a DFILE to your new address.

DFILE will be unblocked on your wallet every second until one year has passed since the launch

Important: DNET tokens will not disappear and will remain with you after the DFILE launch.

*DNET tokens can be purchased at a private sale only until 2021.

**Every new DeNet product launched with tokens will get free tokens equal to DNET.
